SUBJECT INDEX

A

Abortion, 223–56
  critical events in history of, 245–51
  current status in America, 224–29
  future of, 251–56
  government intervention in, 246–47
  health effects of, 229–44
  mortality rates and, 231–34
  repeat
    risks of 231–36
Accidents
  social relationships and, 339
Acculturation
  familial functioning and, 75
2-Acetylaminofluorene
  biotransformation of, 392
Adaption process
  familial functioning and, 75
Adolescent women
  legal abortion and, 227–28
  pregnancy and, 239–40
Adolescents
  cognitive development and health status of, 273
Aflatoxin B1
  biotransformation of, 392
Age effect
  longitudinal research and, 3–5
Air pollution
  federal regulations on cost impact of, 53–54
Airborne biological agents
  indoor pollution and, 207–8
Airborne pollutants
  land use and hazards associated with, 50–51
Alcoholism
  social relationships and, 339
Allergens
  asthma and, 208
Allergic alveolitis
  fungi and, 208
Allergic dermatitis
  formaldehyde and, 210
Allergic disease
  antigens and, 208
Ambrosia maritima
  schistosomiasis control and, 315
Amelioration
  environmental hazards and, 52–53
Aminoaciduria
  cadmium and, 368
Amniocentesis
  Down's syndrome diagnosis and, 237
Amoscanate
  for schistosomiasis, 317
Anesthesia
  use during abortion, 244
Angina pectoris
  incidence analysis of, 81
Anthropogenic hazards
  see Environmental hazards
Antibiotics
  use during abortion, 244
Anticoagulant therapy
  randomized clinical trials of, 40–41
Antigens
  allergic/asthmatic disease and, 208
Anturane Trial, 31
Anxiety
  biological rhythm disruptions and, 348
  hierarchial status and, 343–44
Artificial light
  physiological functioning and, 348–50
Artificial ventilation
  health problems and, 349–50
Asbestos
  indoor pollution and, 206–7
Asbestosis
  asbestos exposure and, 206
Asthmatic disease
  antigens and, 208
  formaldehyde and, 210
Astiban
  for schistosomiasis, 316

B

Benzene
  carcinogenicity of, 207
Benzene hexachloride
  biological monitoring and, 381
Bereavement
  mortality rates and, 340
Beta blockers
  clinical trials of, 27
Biofeedback
  clinical status of, 303–6
  hypertension control and, 294–306
Biological agents
  indoor pollution and, 207–8
Biological monitoring, 363–412
  cadmium and, 367–71
  cytogenetic methods and, 403–6
  DNA adducts and, 409–12
  hemoglobin alkylation and, 397–401
  mercury and, 375–80
  mutagens in human samples and, 391–93
  polychlorinated biphenyls and, 381–83
  respiratory assessments and, 385–89
Biological rhythms
  physiological functioning and, 348
Biomphalaria alexandrina
  schistosomiasis control and, 315
Biomphalaria glabrata
  schistosomiasis control and, 315
Birth defects
  legalization of induced abortion and, 237–38
  rubella during pregnancy and, 245
Birth order
  dependency on health services in children and, 271
Birth process
  mechanization of, 351–52
Blood
  cadmium in, 370
Blood pressure
  effects of migration on, 76–80
  passive smoking and, 214
  see also Hypertension
Bronchial asthma
  formaldehyde sensitization and, 210
Bulinus truncatus
  schistosomiasis control and, 315

C

Cadmium
  biological monitoring and, 367–71
Cancer
  formaldehyde and, 209
  rates of
    effects of migration on, 77
  see also specific type
Carbon monoxide
  airborne
    adverse effects of, 51
  carboxyhemoglobin levels and, 211
Carboxyhemoglobin levels
  indoor combustion and, 211
Carcinogens
  detection of
    DNA adducts and, 409–12
Cardiovascular disease
  passive smoking and, 213

Cardiovascular risk factors
industrialization-urbanization and, 79–80
Cerebral malaria
treatment of
controlled clinical trials in, 28
Chemotherapy
for schistosomiasis, 316–18
Chickenpox
airborne transmission of, 208
Children
cognitive development and health status of, 273
concepts of illness of
developmental aspects of, 274–75
dependency on health services in, 270–71
health-related beliefs and behavior of, 260–75
factors in, 280–81
hospitalized
emotional reactions of, 275
smoking behavior of, 267–68
Chlordane
biological monitoring and, 381
Chromosome aberrations
cytogenetic analysis of, 403–4
Clinical trials, 24–52
assigning treatment and, 33–35
attribution of events and, 30–31
combining evidence from 40–41
crossover and parallel comparisons and, 31–33
designs of, 38–40
ethics and, 27–28
management and, 33
planning and, 28–30
reporting, 38
statistical analysis and, 37
stopping, 35–37
Clofibrate
clinical trials using, 31
Cluster analysis, 157–60
Cohort effect
longitudinal research and, 3–5
Comprehensive Community Mental Health Centers, 135–36
Confusion
biological rhythm disruptions and, 348
Consumer products
indoor pollution and, 207
Contraception
repeat abortion and, 235–36
Copper sulphate
schistosomiasis control and, 314
Cornonary Drug Project, 30–31
Coronary heart disease
clinical trials and, 30–31
incidence analysis of, 83
Japanese immigrants and, 340
rates of
international comparisions of, 80–86
Cytogenetics
biological monitoring and, 403–6

D

Dalkon shields
septic spontaneous abortion and, 233
Databases
clinical, 39
DDT
biological monitoring and, 381–82
carcinogenicity of, 382
Deinstitutionalization, 131–52
Comprehensive Community Mental Health Centers and, 135–36
effectiveness of, 139–50
expectations vs reality in, 138–39
Joint Commission on Mental Illness and Health and, 134–35
judical and legislative interventions and, 136–38
setting stage for, 133–34
treatment prior to, 131–33
Depression
biological rhythm disruptions and, 348
dislocation and, 342
hierarchial status and, 343–44
Dermatitis
acute allergic
formaldehyde and, 210
Dexamethasone
controlled clinical trials with, 28
Diabetes
incidence analysis of, 81
Dischlorodiphenyl trichloroethane
biological monitoring and, 381–82
Dieldrin
biological monitoring and, 381
carcinogenicity of, 382
Dilatation and evacuation
second-trimester abortion and, 240–41
Discriminant analysis, 171–72
Disease
biological and cultural heritage and, 347–53
hierarchial status and, 343–47
social relationships and, 339–43
Disease causation
host-resistance model and, 338–39
model of, 339
DNA adducts
carcinogen detection and, 409–12
Down's syndrome
legalization of induced abortion and, 237
Drinking water
activated carbon filtration of
cost impact of, 54
land use and hazards assoicated with, 49–50
Drug abuse
biological rhythm disruptions and, 348

E

Electrophilic compound dosimetry
hemoglobin alkylation and, 397–401
Environmental hazards, 48–64
amelioration and, 52–53
anthropogenic, 49–51
assumption of risk and, 52
locational planning and, 55–56
modification of, 53–54
natural, 48–49
site-level planning and, 56–58
Enzyme-linked immunoabsorbent assay
schistosomiasis control and, 326
Erythroblastosis fetalis
Rh immune globulin and, 243–44
Erythrocytes
micronuclei of
cytogentic analysis of, 405
Exercise
hypertension control and, 293–94
Expired air
biological monitoring and, 385–89
Extended Care Facilities, 106

F

Factor analysis, 157–60
Family
  acculturation process and, 75
  health-related beliefs and behaviors of children and, 280–81
Flood control
  costs of, 53
Forced expiratory volume
  biological monitoring and, 386–89
  measurement of, 7–8
  multivariate analysis and, 166
Formaldehyde
  concentration in homes, 209
  emission from selected products, 209
  health effects of, 210
  indoor pollution and, 208–11
Fungi
  allergic alveolitis and, 208

G

Gastrointestinal disorders
  biological rhythm disruptions and, 348
General anesthesia
  abortion death and, 244
Glucosuria
  cadmium and, 368
Growth in stature
  analytical models of, 15–19

H

Health
  self-care in, 181–97
  see also Public health
Health care regulation, 91–127
  capital expenditure controls in, 95–96
  conflicting objectives in, 121–23
  cost-effectiveness of, 111–12
  decision-making rules and, 109–11
  due process and, 107–9
  evaluation of, 112–14
  facility standards in, 92–93
  federal vs state, 116–18
  fragmentation and, 114–16
  Health Maintenance Organizations and, 96–97
  incentives and, 119–21
  pilot testing and, 118–19
  positive effects of, 125–27
  state rate-setting programs and, 97
  unanticipated effects of, 123–25
  utilization review in, 94
Health education
  schistosomiasis control and, 319–20
Health Maintenance Organization Act of 1973, 96–97, 118
Health maintenance organizations, 96–97, 118–19, 122
Health of children, 259–82
  see also Children
Heart disease
  life changes and, 340–41
  rates of
    effects of migration on, 77–78
Heart rate
  passive smoking and, 214
Helisoma spp.
  schistosomiasis control and, 315–16
Hemogobin alkylation
  electrophilic compound dosimetry and, 397–401
Heptachlor
  biological monitoring and, 381
Hospice movement, 352
Hospital death
  dehumanization of, 352
Hospital Survey and Construction Act of 1946, 92–93
Host resistance
  disease causation and, 338–39
Hypersensitivity pneumonitis
  thermophilic organisms and, 208
Hypertension
  diet modification and, 288–93
  nonpharmacologic treatment of, 285–306
  physical exercise and, 293–94
  stress reduction techniques and, 294–306
Hypertension Detection and Follow-up Program, 286–87
Hysterectomy
  pregnancy termination and, 242–43
Hysterotomy
  pregnancy termination and, 242–43

I

Indoor combustion
  indoor pollution and, 211–12
Indoor pollutants
  concentrations of, 205
  health effects of, 204–17
  sources of, 203–4
  total exposure to, 215–17
Industrialization
  cardiovascular risk factors and, 79–80
  social relationships and, 341
Infant mortality rate
  legal abortion and, 237–38
Influenza
  airborne transmission of, 208
Informed consent
  clinical research and, 27–28
Intrauterine devices
  septic spontaneous abortion and, 233
Isometric exercise
  hypertension control and, 293–94
Isotonic exercise
  hypertension control and, 293–94
Israel Ischemic Heart Disease Project, 80–82

J

Japanese-American Coronary Heart Disease Study, 82–84
Joint Commission on Mental Illness and Health, 134–35

K

Kidneys
  cadmium and, 367–68

L

Land use planning
  effectiveness of, 61–62
  hazard mitigration and, 55
  health and, 47–64
  locational, 55–56
  obstacles to, 62–63
  payoffs from, 63
  potential shortcomings, of, 58–60
  site-level, 56–58
Latrines
  schistosomiasis control and, 318–19
Lead
  airborne
    adverse effects of, 50
Lead poisoning
  childhood, 204
Legionnaire's disease
  airborne transmission of, 208
Life-table analysis
  regression methods for, 175

Lime
  schistosomiasis control and, 314
Local anesthesia
  use during abortion, 244
Loneliness
  dislocation and, 342
Longitudinal research, 1–21
  analysis of, 11–20
  conduct of, 9–11
  design of, 2–9
Lung cancer
  asbestos exposure and, 206–7
  life changes and, 340–41
  passive smoking and, 213

M

Marisa cornuarietis
  schistosomiasis control and, 315–16
Marital status
  legal abortion rates and, 228–29
Measles
  airborne transmission of, 208
Measles virus
  disease causation and, 338
Medicare
  utilization reviews and, 94
Meditation
  hypertension control and, 296
Mental illness
  deinstitutionalization and, 131–52
Mercury
  biological monitoring and, 375–80
Mesothelioma
  asbestos exposure and, 206
Meta-analysis
  clinical trials and, 41
Metrifonate
  for schistosomiasis, 316
Micronuclei
  cytogenetic analysis of, 405
Migration
  health consequences of, 69–86
  mortality, morbidity, and blood pressure levels and, 76–78
  studies of
    logic and design of, 70–73
    schema for, 76
    theoretical formulations of, 73–75
Molluscicides
  schistosomiasis control and, 314–16
Morbidity
  effects of migration on, 76–80
Mortality
  effects of migration on, 76–80
Multiple logistic regression, 172–74
Multivariate analysis, 155–78
  cluster, 157–60
  factor, 157–60
  principal components of, 157–60
  purposes of, 160–71
  risks in using, 175–78
  scope of, 156
  techniques of, 171–75
  types of, 157–60
Multiway tables
  log-linear models for, 174–75
Mumps
  airborne transmission of, 208
Muscular dystrophy
  funding per case, 311–12
Mutagens
  biological assays for, 391–93
Myocardial infarction
  anticoagulant therapy for randomized clinical trials of, 40–41
  clinical trials and, 31
  incidence analysis of, 81

N

Nasal-buccal cancer
  formaldehyde and, 209
National Flood Insurance Act
  local compliance with, 59
National Flood Insurance Program
  criticisms of, 58
National Health Planning and Resources Development Act of 1974, 95, 102, 120
Natural hazards
  see Environmental hazards
Niclosamide
  schistosomiasis control and, 314
Niridazole
  for schistosomiasis, 316
Noise pollution
  health impacts of, 51

O

Obesity
  hypertension and, 292–93
Oltiprax
  for schistosomiasis, 317
Oxamniquine
  for schistosomiasis, 316
Oxygen consumption
  passive smoking and, 214

P

Paracervical block
  abortion death and, 244
Parasitology
  schistosomiasis control and, 322–23
Passive smoking
  carboxyhemogobin levels and, 211
  indoor pollution and, 212–15
Pennyroyal oil
  self-induced abortion and, 233
Peptic ulcer
  incidence analysis of, 81
Pesticides
  biological monitoring and, 381–83
Phytolacca dodecandra
  schistosomiasis control and, 315
Pollutants
  see specific type
Pollution
  air
    federal regulations and, 53–54
  noise
    health impacts of, 51
  water
    sources of 49–50
Ploychlorinated biphenyls
  biological monitoring and, 381–83
  carcinogenicity of, 382
Pomacea australis
  schistosomiasis control and, 315
Potassium
  Hypertesion control and, 288–92
Praziquantel
  for schistosomiasis, 316
Pregnancy
  adolescent women and, 239–40
  planned and unplanned
    recent trends in, 238–39
  rubella and, 245
  term
    risk of abortion compared with risk of, 236–37
Principal components analysis, 157–60
Professional Standards Review Organization, 94, 102, 118, 121–23
Profile analysis, 14–15
Prostaglandin
  second-trimester abortion and, 242
Proteinuria
  cadmium and, 367–68
Psychotherapy
  hypertension control and, 295
Public health
  land use planning and, 47–65

see also Health of children
Public Health Act of 1848 (Great Britain), 336
Pulmonary function
biological monitoring and, 386–89

Q

Quarterway House, 147–48

R

Radon
indoor pollution and, 206
Randomization
clinical trials and, 33–35
Relaxation
clinical status of, 303–6
hypertension control and, 294–306
Renin-angiotension system
salt conservation and, 288
Reproductive disorders
formaldehyde and, 209
Respiratory disease
cadmium and, 367
passive smoking and, 213
Respiratory viruses
disease causation and, 338
Rh immune globulin
abortion in Rh-negative women and, 243–44
Rubella
birth defects and, 245

S

Saline instillations
second-trimester abortion and, 242
Sarcoidosis
life changes and, 340–41
Schistosoma spp.
human intection and, 311
life cycle of, 312–13
Schistosomiasis, 311–32
biological studies and, 323
chemotherapy for, 316–18
control of, 313–20
disease specific, 314–18
evaluation of, 325–26
mathematical models of, 326–27
nonspecific, 318–20
programs of 327–32
development of, 321–22
funding per case, 311–12
quantitative parasitology and, 322–23
vaccine development for, 318
water contact studies and, 323–25
Schizophrenia
hierarchial status and, 343–44
life changes and, 340–41
social relationships and, 339
Self-care in health, 181–97
effectiveness of, 194
extent of, 182–91
organized approaches to, 191–92
professional care and, 194–95
public interest in, 190–91
safety and legal status of, 193–94
Self-esteem
dependency on health services in children and, 271–72
Self-medication
extent of, 185–87
Simpson's Paradox, 164
Sister chromatid exchanges
cytogenetic analysis of, 404–5
Sleep disturbances
biological rhythm disruptions and, 348
Smoking
fetal effects of, 213
radon progeny and, 206
school children and, 267–68
see also Passive smoking
Snails
Schistosome parasite and, 312–15
Social relationships
disease and, 339–43
Socioeconomic status
health-related beliefs and behaviors of children and, 280
Sodium
hypertension control and, 288–92
Sodium pentachlorophenate
schistosomiasis control and, 314
Sodium pump
hypertension and, 291
Stress reduction
hypertension control and, 294–306
Suicide
social relationships and, 339
Sulfinpyraxone
clinical trials using seven-day rule and, 31
effectiveness of meta-analysis and, 41
Synthetic fibers
indoor pollution and, 206–7

T

Tarter emetic
for schistosomiasis, 316
Term pregnancy
risk of
risk of abortion and, 236–37
Three Mile Island, 52
Time of measurement effect
longitudinal research and, 3–5
Tokelau Islanders
health consequences of migration on, 84–86
Trifenmorph
schistosomiasis control and, 314
Tuberculosis
airborne transmission of, 208
social relationships and, 339

U

Urbanization
cardiovascular risk factors and, 79–80
social relationships and, 341
Urine
cadmium in, 370–71

V

Vaccination
for schistosomiasis, 318
Variance
mixed-model analysis of, 12–14
multivariate analysis of, 14–15

W

Water
schistosomiasis control and, 319
Water pollution
sources of, 49–50
Water Pollution Control Act Amendments of 1972
criticisms of, 58
Weight control
hypertension and, 292–93
Women
health effects of abortion on, 229–34
see also Adolescent women
Work cpacity
passive smoking and, 214
World Health Organization
schistosomiasis control and, 318, 327–30
